### **ABSOLUTE MAXIMUM RATINGS**

| Supply Voltage, V <sub>CC</sub> 25 V                |
|---|
| Reverse Battery Voltage, $V_{RCC}$ 35 V             |
| Magnetic Flux Density, B Unlimited                  |
| Output OFF Voltage, V <sub>OUT</sub> 25 V           |
| Continuous Output Current, I <sub>OUT</sub> . 25 mA |
| Operating Temperature Range, T <sub>A</sub>         |
| Prefix UGL $-40^{\circ}$ C to $+150^{\circ}$ C      |
| Prefix UGN20°C to +85°C                             |
| Prefix UGS $-40^{\circ}$ C to $+125^{\circ}$ C      |
| Storage Temperature Range,                          |
| $T_c$ -65°C to +150°C                               |

These Hall-effect switches are designed for magnetic actuation using a bipolar magnetic field, i.e., a north-south alternating field. They combine extreme magnetic sensitivity with excellent stability over varying temperature and supply voltage. The high sensitivity permits their use with multi-pole ring magnets over relatively large distances.

Each device includes a voltage regulator, quadratic Hall voltage generator, temperature stability circuit, signal amplifier, Schmitt trigger, and open-collector output on a single silicon chip. The on-board regulator permits operation with supply voltages of 4.5 to 24 V. The switch output can sink up to 25 mA. With suitable output pull up, they can be used directly with bipolar or MOS logic circuits.

The three package styles available provide a magnetically optimized package for most applications. Suffix 'LT' is a miniature SOT-89/TO-243AA transistor package for surface-mount applications; suffixes 'U', and 'UA' feature wire leads for through-hole mounting. Prefix 'UGN' devices are rated for continuous operation over the temperature range of -20°C to +85°C, prefix 'UGS' devices over an extended range of -40°C to +125°C, and prefix 'UGL' devices over the range of -40°C to +150°C.

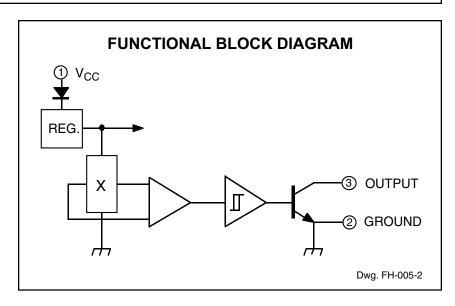

#### **FEATURES**

- 4.5 V to 24 V Operation
- Reverse Battery Protection
- Superior Temperature Stability
- Superior Supply Voltage Stability
- Activate with Multi-Pole Ring Magnets
- Solid-State Reliability
- Small Size
- Constant Output Amplitude
- Resistant to Physical Stress

Always order by complete part number including prefix and suffix, e.g., UGN3132LT.

### 3132 AND 3133 BIPOLAR HALL-EFFECT SWITCHES

### **ELECTRICAL CHARACTERISTICS at T<sub>A</sub> = +25°C**

Operating Temperature Ranges:

 $S = -20^{\circ}C$  to  $+85^{\circ}C$ ,  $E = -40^{\circ}C$  to  $+85^{\circ}C$ ,  $J = -40^{\circ}C$  to  $+115^{\circ}C$ ,  $K = -40^{\circ}C$  to  $+125^{\circ}C$ ,  $L = -40^{\circ}C$  to  $+150^{\circ}C$ 

Notes 1. Protected.

- 2. Output 1 switches on south pole, output 2 switches on north pole for 2-phase, bifilar-wound, unipolar-driven brushless dc motor control.
- 3. Power driver output.
- 4. Active pull down.
- 5. Complementary outputs for 2-phase bifilar-wound, unipolar-driven brushless dc motor control.
- \* Minimum.

<sup>†</sup> Latches will <u>not</u> switch on removal of magnetic field; bipolar switches <u>may</u> switch on removal of field but require field reversal for reliable operation over operating temperature range.
