

## Thermal Glue for Heatsinks - 5g - STARS-922

This thermal adhesive can be used to attach cooling blocks to electronics.

Specifications:

- Content: 5g
- Temperature(max): 200°C (24 hours long)
- Thermal conductivity: >0.671W/m.k
- Material is based on silicone
- Evaporation: 0.001% (200°C 24 hours long)
- Drying time: ~3min (on 25°C)

Note: This thermal glue is not a substitute for thermal paste. If your cooling block is normally fitted with screws for example, then you should use the thermal paste.(conductivity of thermal paste is better)
