

IC Storage Box

36 Grids Plastic Electronic Component/ IC Storage Box

About this Item

You can use this box to store all the small parts, like the IC chips, capacitors, resistors, small screws, nuts, washers, and lock washers etc. The special designed ambient profiles ensure a secured connection with other boxes of the same or different sizes. This feature enables you to make your own box in any configuration you want.

This is a pretty good plastic case for you to store a lot of ICs chips, suitable for most kinds of chips, remove one plate to combine two compartments into one, so you can store big ATMEGA 328 chip as well.

Use this large-sized plastic box to store components. This box is perfect for storing resistors, capacitors, LEDs, connectors, etc.

Features:

- 36 Compartments free to change, combine
- 272 x 175 mm Compact size for small electronic components, a nice size. the height is around 42mm
-
- Transparent materials, so you can see through into it.

Usage:

- Flip over the cap to open, **chips, most general small DIP items** can store in a good protected condition
- SMD raw items like **0805 resistor** you can leave in it, it won't come out but just be aware when you open it
- Remove the separator, you can store **a short strip of SMD items**
- Plastic Box Dimension: 272 x 175 x 42mm
- Removable partitions
- Dividers included
- Transparent
