

**PL7**

## **IEC Programming Software for Micro and Premium**

Programming software for Micro and Premium.

- **Features**

The PL7 software range has been designed to develop your Premium and Micro control system applications. It offers the following features:

In design

- Application-specific modules with no need for programming
- A choice of 4 languages
- Predefined functions
- Re-use of DFBS

Debugging

- Availability of the latest version
- On-line modification
- Code animation

- Application and data debugging

## Benefits

### The simple, high-performance solution

Designed for setting up Modicon TSX Micro and Modicon Premium PLCs, Telemecanique's PL7 software range is distinguished by its **simplicity**, offering more productive design functions, high-performance debugging, as well as easier operation and diagnostics.

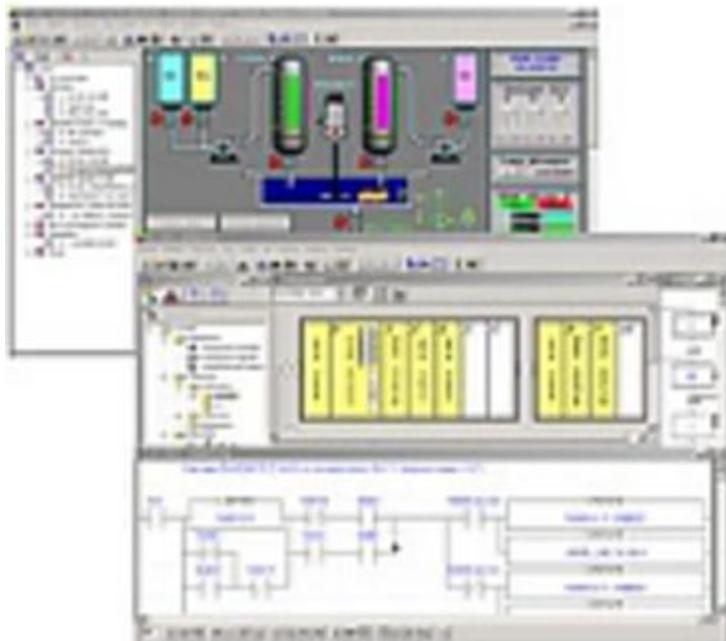

## Applications

- Machine & manufacturing control
- Infrastructure
