

## **ADAPTER SMD SOP 16**

**This is basically a Zif Socket for 16 pin SOP Package SMD IC's also called as SMD IC programming adapter or Adapter seat CNV-SOP-NDIP16.**

**Want to test 16 pin SMD IC's before soldering in your product or if you want to program SMD 16 pin micro-controllers then this is the perfect 16 pin SMD ZIF Adapter for you.**

**This is basically a Zif Socket for 16 pin SOP Package SMD IC's also called as SMD IC programming adapter or Adapter seat CNV-SOP-NDIP16.**

**If you want to program any 16 pin SMD controller then just plug in the controller in this zif socket and place it in your programmer and you can then program the SMD controller as you program a DIP micro-controller.**

**Features of SOP-DIP16:**

**You can use it for SOP16, SO16, SOIC16 packages**

**Very compact design & useful**

**High quality open top ZIF, easy for device IC removal**

**Rapid change device**

**High reliability**

**Idea for work with many universal programmers**

**Applicable models: All of the programmer: For example: ALL 11, Superpro, RF, LabTool48uxp, G540, Picstart-Plus, SPI-100A.**
